

ECOLUXX optics

ALDPT5

- optics system category 2 reduced brightness under 200 cd/m² in angles above 60°
- parabolic longitudinal reflectors
- parabolic cross blades are closed for higher efficiency
- versions
 - o brightly polished aluminium (ALDP)
 - o mat aluminium (MATDP)
 - o super reflectans brightly polished aluminium MIRO (ALDP MIRO)
- fittings with this louvre are designed for offices, spaces with screens and spaces with high requirements for glare control

ALDPT5

ALDPT8

- optics system category 2 reduced brightness under 200 cd/m² in angles above 60°
- parabolic longitudinal reflectors
- versions
 - o brightly polished aluminium (ALDP)
 - o mat aluminium (MATDP)
 - o super reflectans brightly polished aluminium MIRO (ALDP MIRO)
- fittings with this louvre are designed for offices, spaces with screens and spaces with high requirements for glare control

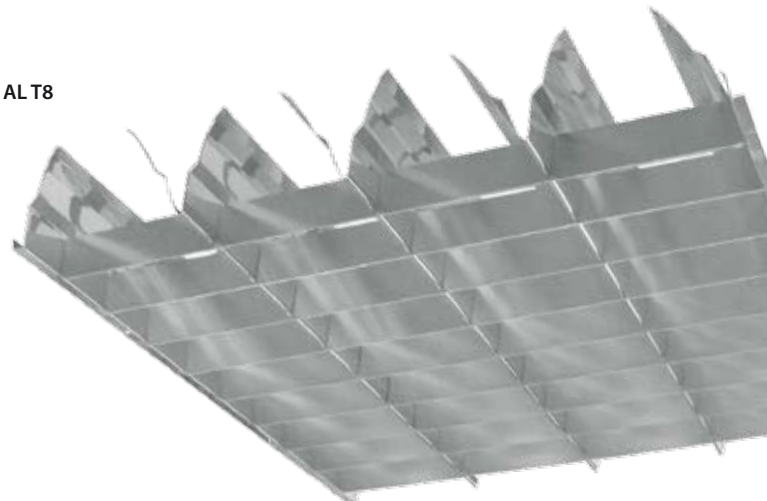

ALDPT8

AL

- parabolic longitudinal reflectors of brightly polished aluminium
- cross blades of mat aluminium
- fittings with this louvre are designed for general spaces, as offices, shops, school classes, ...

AL T8

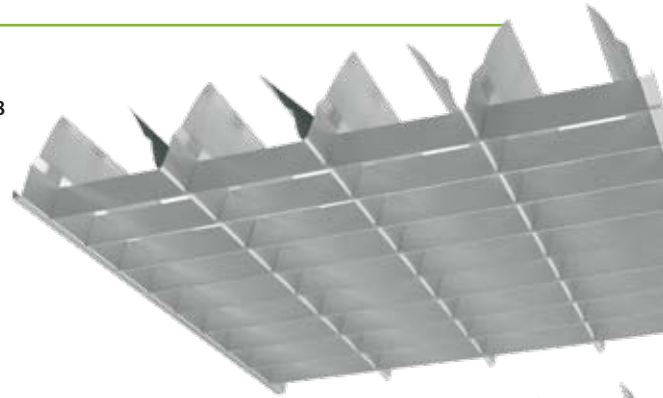

ECOLUXX optics

ALMAT

- parabolic longitudinal reflectors of mat aluminium
- cross blades of mat aluminium
- fittings with this louvre are designed for general spaces, as offices, shops, school classes, ...

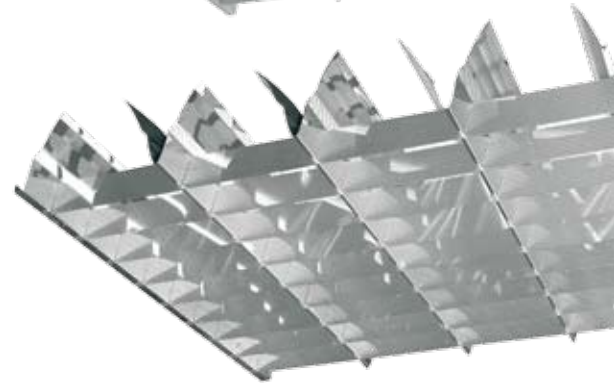

ALMAT T8

ALS

- parabolic longitudinal reflectors of brightly polished aluminium
- cross blades of mat aluminium with tree pattern
- fittings with this louvre are designed for general spaces, as offices, shops, school classes, ...

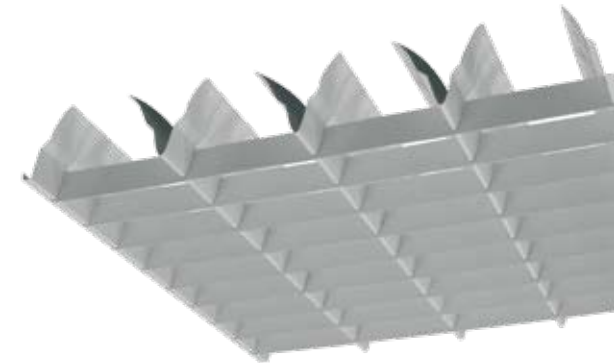

ALST8

B

- parabolic longitudinal reflectors of white painted aluminium
- cross blades of white painted aluminium
- fittings with this louvre are designed for shops, corridors, sanitary facilities, ...

BT8

KO, KP

- opal or prismatic cover
- fittings with cover are designed for corridors, sanitary facilities, shops, ...

KP T8

KO/IP54, KP/IP54

- opal or prismatic cover with aluminium frame and gasket
- the cover can be ordered separately
- special fixing springs

KO/IP54, KP/IP54
